PREFACE.

In presenting the "National Directory of Victoria" to the notice of the public, the publishers have to express regret that the issue of the work has been slightly delayed beyond the advertised date; but they trust this will be overlooked, as the delay has been owing chiefly to their desire to add to the completeness of the work and enhance its value as a Directory.

The names and addresses, in each town and township, have been separately arranged, in alphabetical order; but the scattered population has been classed under the various districts, thus—"The Lodden District Commercial Directory," &c. This plan, they trust, will meet with the approval of the public.

To Wilson and Mackinnon's "Bradshaw's Guide to Victoria" they are indebted for a portion of the up-country information, which they have made as complete as practicable under the circumstances.

In conclusion, the publishers beg to return their sincere thanks, first, for the universal support which their attempt to supply a long-felt desideratum has received; and, secondly, to those gentlemen who have rendered valuable assistance in the compilation of the work, amongst whom they would specially recognise Mr. R. Grundy, of Ballarat, to whose exertions they owe a great portion of valuable information respecting that important district.

BUTLER & BROOKE,

PUBLISHERS.

GENERAL INFORMATION.

COLONY OF VICTORIA.

VICTORIA has an area of 86,831 square miles (55,571,840 acres), or 2,813 square miles less than that of England, Scotland, and Wales united. Its greatest length from east to west is about 480 miles, with an average breadth of about 180 miles. It is separated from South Australia on the west, by an incorrectly-marked boundary line along the supposed 141st meridian, from the sea coast to the river Murray; from New South Wales on the N. and N.E. by the river Murray to its principal source; thence by an imaginary boundary line E.S.E. to Cape Howe. From Cape Howe, which is on about the 150th meridian, west to the 141st meridian, it is bounded on the south by Bass's Straits and the Pacific Ocean. The most southerly points of Victoria and of the continent of Australia are at Wilson's Promontory (39 deg. 8min. south latitude), and at Cape Otway (38 deg. 51 min.). The most northerly point is at the north-west angle of the colony (about the 34th parallel of south latitude).

A main range or watershed extends from east to west throughout nearly the whole length of the colony, giving rise to rivers, which flow northwards towards the Murray River, and south to the ocean. The climate is generally excellent; but with the whole breadth of Australia on the north, and the wide Pacific Ocean on the south, there are occasionally great fluctuations in the temperature, caused chiefly by changes in the atmospherical currents.

In the year 1803 New South Wales made an attempt to form a convict settlement near the Heads of Port Phillip; but on the 27th of January, 1804, the party abandoned the region in great haste, characterising the territory as an "unpromising and unproductive country." For thirty years nothing further was done, until the Messrs. Henty settled at Portland Bay, in about the year 1833. In the year 1835, the private enterprise of some Tasmanian colonists led to the establishment of the Colony of Victoria. The following correct historical dates are derived from a blue book of the British House of Commons: The late Mr. John Bateman first arrived on the 26th of May, 1835. On the 15th of August, 1835, Mr. J. P. Fawkner's party arrived, and on the 10th of October following he himself reached Port Phillip. The first census was taken on the 25th of May, 1836. There were then in the new colony 142 males and 35 females—in all 177 souls. On the 7th of April, 1861, the total population numbered 540,322, or 328,651 males and 211,671 females. On the 31st of March, 1865, according to the estimate of the Registrar General, there were in the colony 351,023 males and 259,870 females, in all 610,893 souls.—Extracted from *Bradshaw's Guide*.

MALDEN ISLAND GUANO,

£7 5s. per Ton

(BAGS INCLUDED), DELIVERED IN MELBOURNE.

Each Bag is branded
PHOSPHATIC GUANO,
FROM
MALDEN ISLAND.
B. B. NICHOLSON & CO.,
59 Bourke st. west,
MELBOURNE.

THE undersigned are the only importers of this valuable Guano, which contains nearly **80 per cent.** Phosphate, with small quantities of Sulphate and Carbonate of Lime, but quite free from Sand or Earthy Matter.

The above Guano will be found a most useful manure when applied to all soils, but especially so when put on those that are poor or exhausted from overcropping.

It is well known that the soils of the Colony are deficient in all sorts of Lime; the Malden Island Guano is rich in those constituents; therefore more suitable, as a manure, than the hot and stimulating Peruvian, which can only be used successfully in forcing crops on rich lands. For all general agricultural purposes the Malden Island Guano will be found better than the Peruvian, and costs only half the price.

£7 5s. per Ton, Bags included, delivered in Melbourne.

PETER SKIRVING

RESPECTFULLY announces to his friends throughout the Western District that he has always in stock a choice and very excellent assortment of **New Seasonable Goods**, comprising Imported Clothing, Hosiery, Shirts, Hats, &c., and all the various articles included in the Outfitting Trade. Visitors, therefore, can at once be furnished with every requisite for a complete and fashionable outfit.

But he would more particularly call attention to those goods of his **own Manufacture**, viz., **Colonial Clothing**; being made on the premises, thoroughly shrunk, and of excellent material, they are unrivalled for town or country wear, and the fast-increasing demand shows how high they already stand in public estimation.

In garments made to measure, it has been his constant aim to produce durable and moderately-priced articles, and, having always on hand a large variety of the season's Tweeds, he is enabled now to make to order, for cash, fashionable and superior

THE CURRICULUM OF STUDY embraces a complete course of instruction in all the branches of a thorough English, Commercial, Mathematical, and Classical Education. For Junior Boys the course is elementary, and comprises Spelling, Reading, Writing, Arithmetic, Grammar, Geography, History, the elements of Latin, Music, and Natural Science. The utmost care is taken that every boy is well grounded in the subjects taught, before being advanced to a higher stage.

There are two definite courses of study, each connected with the termination of the Elementary Course—the one affording a complete preparation for the University and Learned Professions; the other for Mercantile life and the ordinary avocations of business. In the former, special attention is given to Latin, Greek, and Mathematics; in the latter, Modern Languages and the usual Commercial Branches occupy the chief place. In both Courses alike, English in all its branches forms a principal part, and, from its vast importance, receives marked attention.

VOCAL MUSIC is included in the regular course of study. There are also open to all the Students of the College, without extra charge, Special Courses of Lectures on the English Language and Literature, Natural Science, and other interesting and important subjects, by gentlemen of acknowledged ability.

CLASSIFICATION.—All the boys are classified according to their progress in English, Classics, Mathematics, Modern Languages, and Commercial subjects, respectively, without reference to their proficiency in any of the others.

The Religious Instruction is Scriptural, without regard to Denominational distinctions. In this branch the attendance or non-attendance of the pupils is altogether optional, and in accordance with the wishes of parents and guardians. Particular attention is directed to the moral conduct and demeanour of the Pupils.

PHYSICAL EDUCATION.—The Physical comfort of the pupils, while at work, is secured by large and well-ventilated class-rooms; each class has a separate room. The situation of the College in the highest and healthiest part of the town, in a very spacious reserve, offers unusual facilities for cricket, foot-ball, and every variety of heathful exercise. All the pupils of the College have the opportunity of being instructed in the Art of Swimming, at the splendid Baths recently constructed at Ballarat.

In the BOARDING DEPARTMENT, the advantages of instruction in the public classes are combined with the careful supervision and training of the boarders by the Principal and Resident masters, in the preparation of their work.

PRIVATE INQUIRY OFFICE,

Established A.D. 1866.

78 Elizabeth street, Melbourne, Victoria.

MR. BERLINER (late detective officer) has the honour to inform his numerous friends and the public, that, at the suggestion of several mercantile firms of high standing, and solicitors of eminence, he has established a Private Inquiry Office. Mr. Berliner has reason to hope that his uniform attention to business, coupled with the good character he has had the satisfaction to receive on his retirement from public service, extending over ten years in both colonies of Victoria and New South Wales, will entitle him to merit the confidence of his employers.

COPIES OF TESTIMONIALS.

Understanding that Mr. Berliner does not seek an appointment under this Government, with whose patronage it would be unbecoming in me to interfere, I have no hesitation in stating that, so far as my means of observation as Chief Justice extends, Mr. Berliner is an active and efficient officer, possessed of sagacity and discretion.

(Signed) W. F. STAWELL,
Melbourne, December 13, 1865. Chief Justice of the Colony of Victoria.

I concur in the last Testimonial, so far as my means of observation extend.

(Signed) ROBT. MOLESWORTH,
Melbourne, Dec. 14, 1865. One of Her Majesty's Judges at the Supreme Court of Melbourne.

I fully believe Mr. Berliner to be a most efficient officer, from the knowledge I have had of the performance of his duties. (Signed) EDWARD E. WILLIAMS,
Dec. 14, 1865. One of Her Majesty's Judges at the Supreme Court of Melbourne.

I have had many opportunities, as Chairman of General Sessions for the District of Bourke, of observing the intelligence and zeal of Mr. Berliner as a member of the Detective Force. It has often occurred to me that he is qualified for a better position than he has held.

(Signed) R. W. POHLMAN,
Melbourne, December 7th, 1865. Chairman of General Sessions.

I have no hesitation in certifying to my knowledge of the conduct and character of Otto Berliner, lately of the Detective Police Force. He has been much under my observation for many years; he is thoroughly sober, strictly honest and trustworthy, with a considerable amount of judgment and acumen in the pursuit of police inquiries. (Signed) E. P. S. STURT,
Melbourne, 6 | 12 | 65. Police Magistrate of Victoria.

Mr. Otto Berliner was well known to me, while occupied in the Detective Police Force of this colony, at the gold-fields of Indigo and Wahgunyah, during the years 1859—61. Mr. Berliner's conduct during that time was marked by the greatest zeal and attention to his duties, and, during the time he remained in the district under my supervision, I had every reason to be pleased with the manner in which he carried out the onerous and difficult functions of his office.

(Signed) WM. H. GAUNT,
One of Her Majesty's Wardens for the Gold-fields and a Police Magistrate for Victoria.
Beechworth, Victoria, Dec, 11, 1865.

Bank of New South Wales, Melbourne, 1st Dec., 1865.

OTTO BERLINER,

Sir,—In March last year a letter was addressed to the Superintendent of the Detective Department of Police, by me, expressing the Bank's appreciation of your conduct and ability in detecting, arresting, and securing the conviction of the forger Nelson. Understanding that you are now desirous of obtaining some settled and permanent employment, I am anxious to place this on record, and I may add that I am of opinion that you would prove a useful officer in any department of business where energy and perseverance were essential.

I am, your obedient servant,
(Signed) J. BADCOCK, Manager of the Bank of N.S.W.
